

MFL Biography

My name is Ms Trapani and I have been learning languages from the age of 3! I am bilingual (Italian and English) and can also speak some French, Spanish and a tiny bit of Arabic. I also studied German as part of my university degree.

I am very passionate about learning languages as I believe they are the key to intercultural understanding. I lived in the Middle East for a few years and enjoyed learning some Arabic to connect with the local community.

I love travelling and always try to learn some useful phrases in the local language to communicate while visiting a foreign country. The biggest challenges for me so far were Mandarin and Polish!

I am excited to pass on my passion for language learning to the children at Oakhill and Hanbury's Farm so that they become life long language learners and will explore the world and its beautiful diversity.
