

Maths - Biography

I have worked for the Federation for 9 years now. I lead Science and Forest School across the Forest School and as of this academic year, the brilliant opportunity to lead Maths too.

I have always had a fondness for Maths which can be summarised by this quote, "The study of mathematics, like the Nile, begins in minuteness but ends in magnificence" (Charles Caleb Colton).

Being both the Maths and Science lead, I realise that Maths reaches far beyond numbers and is a part of every day life. Maths enables you to reason, problem solve and teaches critical thinking.

We take a mastery approach and our mission is to instil an 'I can' belief in our children so that they approach Maths confidently and with a growth-mindset.
